## OFFICIAL

CPO , DCPO,

In this email below is a broad time line of events related to the brief of evidence and its service to the Defence barrister. If you seek further details I can get the team to provide the referenced CNEs. Key points in time was around the service of the brief (unredacted) , id of the issue of unredacted material and retrieval / replacement of BOE.

A key issue emerging here is that whilst further review of the BOE for “sufficiency of evidence” was not necessarily needed due to the “red team” efforts of D/Supt Smith etc. , the decision to not adjudicate the BOE any further therefore then meant other adjudication actions such as redactions and removal of material in the Defence copy were not attended to.

It would appear that whilst our existing systems of adjudication and BOE service sufficiently ensure such errors are minimised or excluded completely, but in this instance, the established routine processes were not followed, thereby creating the opportunity for such routine issues (eg. Redaction and removal of legally excluded material) to be overlooked or forgotten - thereby creating the mistake of serving an unredacted brief to the Defence on 6 August 2021.

Attached is an email which if read backwards shows the interaction between primarily DPP Drumgold and D/Supt Moller about identifying the redaction issue and its remedy in Sept 2021.

Importantly, DFT have asserted no copies of the BOE (unredacted) where made and an assertion from Mr Korn that none of the material of concern was accessed by anyone.
