OFFICIAL

Boss,

I've looked the EB over, and made a couple of mostly cosmetic changes -

- * I've reworded the paragraph about the EIC on the 26th of May.
- * I've also inserted "in March 2019" in the next paragraph to aid with context.
- * In the subsequent paragraph, I inserted "then [partner]" (to differentiate between the partner she had then from her current partner - I'm not fully across the brief but have picked up that she had a different boyfriend at the time of the incident in March 2019 than she does now... I may be wrong about that...If I am, delete the word [then])
As a suggestion though, perhaps with the paragraph about her "history of anxiety and depression..." should include some context about how investigators have discovered this - eg. [REDACTED]

[REDACTED] . "And furthermore, [REDACTED]"

Cheers,
Bob
