Good evening Leon,

As discussed today Detective Superintendent Scott Moller and myself need to speak with Brittany personally regarding advice we have recently received from the ACT DPP. We need to discuss the advice, our intended action moving forward and a number of other associated matters. It is imperative these discussions are held in person to maintain privacy and also from an evidentiary perspective.

The need for a close working relationship Brittany, without external influences or interference is important to enable police to progress the investigation. The process of going through a third party every time police need to speak to Brittany is inhibiting the investigation and problematic.

As discussed if it is the case Brittany would like a support person present, police have no issue with this and I encourage Brittany to do so.

As advised we are willing to travel to Brittany if this is more suitable to her.

I will await to hear back from you regarding a suitable time and date.

Kind Regards

Marcus
